

light. speed ahead.

The new spectro::lyser V3

s::can

Intelligent. Optical. Online.

Wireless communication

Communicates directly with your mobile device via **Bluetooth** or WLAN. No terminal required.

Web server on board - IoT enabled

No additional software is needed to configure the probe.

Optical information ring

The color of the optical information ring signals the state of the sensor.

Three different optical path lengths

The perfect measuring range and accuracy for every application.

Revolutionary precision

Improved optical efficiency and intelligent algorithms.

Fast measurement interval

Every 10 seconds, no delays, detects events immediately.

Huge 8 GB onboard memory

Allows logging data for longterm monitoring.

Extremely power efficient

Sleep mode with only 2 mW power consumption.

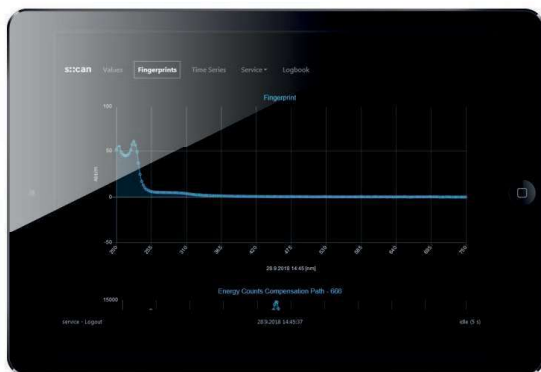

Wireless communication - Io::Tool

Intuitive web interface for data visualization and configuration of the spectro::lyser V3.

View all your data at a glance on your mobile device

Io::Tool visualizes measurement data, time series, fingerprints and status information.

Intelligent IoT enabled spectrometer probe with integrated webserver for smart water quality monitoring

Configure your spectro::lyser, install new parameters, perform calibrations.

spectro::lyser V3 in remote / stand-alone application

Thanks to the WLAN and Bluetooth remote connection in combination with Ethernet the spectro::lyser can be used as stand-alone probe.

Choose your parameters

Freely configure your spectro::lyser for your application.
You only pay for the parameters you want to measure. Add new parameters any time.

spectro::lyser V3

high performance online water quality monitoring - fingerprints and spectral alarms,-
TSS, turbidity, NO3-N, COD, BOD, TOC, DOC, UV254, color, BTX, O3, HS

- Simplicity** Communicates directly with your smartphone via 
- Ingenuity** Web server on board, IoT enabled
- Transparency** Transmits sensor status via optical information ring
- Precision** Provides a new level of optical performance in all applications
- Integrity** With 10000 sensors in the field, we know how to make affordable spectrometers last forever

* ... remaining the undisputed leader in all disciplines

Use it stand-alone or with the high-end terminal con::cube V3

The spectro::lyser V3 is very versatile. You can simply connect it via Bluetooth or WLAN with your mobile device. Configure the spectro::lyser V3 via the user-friendly webinterface lo::Tool and visualize data there. For even more possibilities on connecting/interfaces other sensors, SCADA

or any central database the terminal con::cube V3 is the perfect solutions. It is a compact, powerful and versatile terminal for data acquisition and station control. Due to its low power consumption, this terminal fits the requirements for operation in remote installation sites.

mobile device with lo::Tool

con::cube V3 terminal with moni::tool
